Experience

Iasi, Romania

2023-06 – 2025-05

SOFTWARE DEVELOPER

- Developed user-friendly web pages using HTML5, CSS3, and JavaScript (ES6+), leading frontend refactoring of an exam management platform with Vue.js and Vuetify, improving usability and page load times by 25%
- Implemented responsive design techniques for smartphones and cross-platform compatibility, ensuring optimized performance and seamless user experiences
- Collaborated with backend developers to integrate APIs, handled asynchronous requests with JavaScript, and conducted thorough testing for bugs and usability
- Participated in code reviews using Git for version control, writing clean, functional code to meet project requirements and timelines

Remote, Germany

2025-01 – 2025-06

FULL-STACK ENGINEER

- Developed and architected key dashboard and form components using HTML, CSS, JavaScript, Nuxt.js, and Vue.js to create user-friendly web pages
- Collaborated with design team to transform UI/UX designs into functional applications, implementing responsive and cross-platform design for maximum reach
- Debugged and troubleshoot issues to enhance website performance, scalability, and functionality, ensuring cross-browser compatibility and seamless user experience
- Integrated with backend APIs using JavaScript for asynchronous request handling, while using Git for version control and project management

Remote, Romania

2022-03 – 2023-07

CUSTOMER SERVICE REPRESENTATIVE

- Developed Otis, a JavaScript-based templating tool using clean code to automate form-filling and email generation, enhancing team productivity
- Applied problem-solving skills to debug and troubleshoot JavaScript code for better functionality and user experience
